

- working paper -

When I started to write this paper, I thought about a short article, few thousands words. Since then, it progressed, becoming longer and enlarging its boundaries. Many times I told myself it was over. New ideas and suggestions came through, arising from my work and from my personal life. For these reasons, I consider this as a working paper, open to further developments, under additional resources and feedback.

I am interested in investigating the relation of care without any scientific purpose. I am a psychologist, not a scientist, nor a physician.

I only used physics as a metaphor. For a complete and more detailed view on the history of physics, I suggest to refer to real physicians.

I thank all the people who allowed me to learn by sharing their truth with me. I always knew I was receiving a gift, even when it was unconsciously given.

This paper is dedicated to all my teachers, to whom I have a huge debt; to my children Alice and Lorenzo; to all others who remind me how life is dammed complicated and still, how it can become simple, sometimes, with a touch of air and a smile.

Index

1. Principles	3
2. Introducing the position of the experienced beginner	6
3. Our ancestors, or the circularity of communication	10
4. Nothing is just a case: from Plato to Aristotle, from master Oogway to Jedi knights	13
